

VRF Logistics/Industrial Press Release - 07/07/2021

Logistics/Industrial market in Vienna and surroundings: Vienna Research Forum publishes its figures for the first half of 2021

- Total stock at > 5.5 million m²
- Space take-up in H1 2021 at around 46,900 m²
- Largest letting accounts for 26% of space take-up

In H1 2021, take-up of logistics, production and industrial space in Vienna and the surrounding area amounted to around 46,918 m². This is what the results of the Vienna Research Forum Logistics/Industrial (VRF-LI) show after evaluating the current key data. The VRF only considers logistics premises that meet certain quality criteria such as hall height, shunting area and distance from the motorway. The total logistics take-up incl. areas that are not considered by the VRF amounted to 49,240 m².

The highest quality standards are met by 49% of the classified buildings, so-called logistics class A objects, while 35% are qualified as class B and 16% as class C. For the production and industrial premises, all properties that are currently used for this purpose and meet certain minimum criteria such as hall size were included.

According to the Vienna Research Forum Logistics/Industrial, the largest take-up comprised 12,300 m² in the submarket Vienna Surrounding East. It corresponds to around 26% of the space

take-up on the logistics and industrial market in the first half of 2021. Another major take-up was also registered in the Vienna Surrounding East submarket with 10,000 m².

Looking at the take-up of space by type of use, 86% of the space is accounted for by logistics space and 14% by production space.

For the first time in November 2019, the VRF Logistics/Industrial collected the total stock of logistics, production and industrial space in Vienna and the surrounding area. It has been updated at the end of H1 2021 and amounts to 5,541,532 m²*, of which 52% belong to production and industrial space and 48% to logistics space.

* The total stock of logistics, production and industrial space can change from quarter to quarter due to regular adaptations of unclassified objects, conversions and completions.
